**Subject:** RE: Request for Stakeholder Comment

Hi Terry:

Here are my comments on the draft:

- A. Item 1, as shown, seems to be the NIOSH label. I would suggest that you also include the CBRN label that is located below the cylinder strap.
- B. Item 6 can also be classed as an EOSTI
- C. Item 7: NFPA 1981 does not make a distinction between "primary" or "secondary" EOSTIs so I would suggest removing the term "primary".
- D. Item 8 should also include the cylinder strap since it is part of the retention device.
- E. Some PASS devices (Item A) also include an EOSTI.
- F. Item B can also have an EOSTI coupled with it.

Regards

Bob Sell
